Seeking Lessons Learned

Reimbursement is a key issue for neurotechnology users, medical professionals and the industry. The process can be a challenge. We are seeking 'Lessons Learned' from users or medical/industry professionals who have been through the process of gaining reimbursement for a neurotechnology device. The information gathered will be compiled and used to develop a resource guide for other potential users.

If you have any 'Lessons Learned' or you are a professional with resources to share, [please contact us and give us your input](#). You can help others in the process.

Many Thanks to [Bioness](#) for your sponsorship. [Contact us](#) if you are interested in joining to support this effort.

See Us in Atlanta

Partnering with the Abilities Expo, Neurotech Network will have a presence at the show in Atlanta, Georgia from October 15-17. Look for a workshop and the 2nd Annual Technology Showcase. Click the link below for more information.

The Miracle of Science

The Abilities Buzz recently featured an article titled 'The Miracle of Science' telling the story of Jen French, Executive Director of Neurotech Network, using a neural prosthesis and the upcoming developments. On August 30, Jen will receive the upgrade and begin working with a new system as a participant in a clinical trial.
